The Purple Finch is the bird that Roger Tory Peterson famously described as a "sparrow dipped in raspberry juice." For many of us, they're irregular winter visitors to our feeders, although these chunky, big-beaked finches do breed in northern North America and the West Coast. Separating them from House Finches requires a careful look, but the reward is a delicately colored, cleaner ...

In some circles, however, opposition to the concept of evolution has persisted to the present. The argument from design has recently been revived by a number of academics with scientific credentials, who maintain that their version of the idea (unlike Paley's) is soundly supported by both microbiology and mathematics.

Charles Darwin: Delivering the Evolutionary Gospel. Charles Darwin would not have been anyone's first guess for a revolutionary scientist. As a young man, his main interests were collecting beetles and studying geology in the countryside, occasionally skipping out on his classes at the University of Edinburgh Medical School to do so.

The history of ornithology largely reflects the trends in the history of biology, as well as many other scientific disciplines, including ecology, anatomy, physiology, paleontology, and more recently, molecular biology. Trends include the move from mere descriptions to the identification of patterns, thus towards elucidating the processes that produce these patterns.

Jerry A. Coyne is a professor in the Department of Ecology and Evolution at The University of Chicago. In *Why Evolution is True*, he summarizes Darwinism — the modern theory of evolution — as follows: "Life on earth evolved gradually beginning with one primitive species — perhaps a self-replicating molecule — that lived more than 3.5 billion years ago; it then branched out over time ...
