The first option is sub-optimal, as it requires entering (or copying) your formula twice within the cell. It can be especially nasty when you have a really long formula, and then need to edit (or worse, debug) that formula later. The second option doesn't seem to be working for me, but maybe I'm doing it wrong.

I am attempting to create a chart with a dynamic data series. Each series in the chart comes from an absolute range, but only a certain amount of that range may have data, and the rest will be #N/A.. The problem is that the chart sticks all of the #N/A cells in as values instead of ignoring them. I have worked around it by using named dynamic ranges (i.e. Insert > Name > Define), but that is ...

Match Game is an American television panel game show that premiered on NBC in 1962 and was revived several times over the course of the next few decades. The game featured contestants trying to come up with answers to fill-in-the-blank questions that are often formed as humorous double entendres (beginning in the CBS run), the object being to match answers given by celebrity panelists.
