4. Action-packed controllers. But before we dive into these new concepts, let's quickly recap the purpose of controllers and actions. 4.1 Exploring controllers and actions. As you saw in chapter 2, a controller is one of the core components of an ASP.NET MVC application. It's a class that contains one or more public methods (actions ...

ASP.NET MVC 4 in Action - Amazon Web Services

The data collection includes name/values pairs for form data or query string values or cookie values. Model binding in ASP.NET MVC automatically maps the URL query string or form data collection to the action method parameters if both names are matching. Visit model binding section for more information on it.

Action method in ASP.NET MVC - tutorialsteacher.com

ASP.NET MVC provides Action Filters for executing filtering logic either before or after an action method is called. Action Filters are custom attributes that provide declarative means to add pre-action and post-action behavior to the controller's action methods.

ASP.NET MVC 4 Custom Action Filters | Microsoft Docs

I recently discovered Areas in ASP.NET MVC 4, which I have successfully implemented, but I'm running into troubles with the `@Html.ActionLink` helper in my Razor views. The URL this helper generates always seems to be relative to the URL of the current page. I have my web site configured in IIS 7 (Win7) as an Application virtual directory at /Foo.. I have two Areas registered: Admin and Blogs.

How to correctly use Html.ActionLink with ASP.NET MVC 4 Areas

How to link HTML5 form action to Controller ActionResult method in ASP.NET MVC 4. ... will create a POST form that points to your current controller and current action. As an example, let's say you
