22. Which of the factors in #19 results in individuals that are better suited to their environment. By consistently favoring some alleles over others, natural selection can cause adaptive evolution, which results in a better match between organisms and their environment. 23. Explain the founder effect and the bottleneck effect.

Chapter 23: Evolution of Populations - Biology E-Portfolio

Chapter 22 The French Bourgeois Revolution. From the rising of the Jacquerie in 1358 to the calling together of the National Assembly in 1789, France had passed through the development of her social system, from a congeries of great and small more or less independent feudal territories, to France as a nation under one autocratic monarch.

SPOROPHYTE EVOLUTION One of the most important innovations of early bryophytes was a multicellular sporophyte (Fig. 22.3). Two simple steps can account for the evolution of this new structure. First, meiosis must be delayed in the zygote, which, as you recall, is retained on the parent gametophyte in land plant ancestors. Second, the zygote must

Chapter 22 Bryophytes - Welcome to UCD Plant Biology

A group of small fish live in a lake with a uniformly light-brown sandy bottom. Most of the fish are light brown, but about 10% are mottled. This fish species is often prey for large birds that live on the shore.
