Flatworms, Roundworms, Annelids, Mollusks Flashcards | Quizlet

The shipworms are marine bivalve molluscs in the family Teredinidae: a group of saltwater clams with long, soft, naked bodies. They are notorious for boring into (and commonly eventually destroying) wood that is immersed in sea water, including such structures as wooden piers, docks and ships; they drill passages by means of a pair of very small shells borne at one end, with which they rasp ...

BIOLOGY - University of Washington

From the biological classification perspective, animals belong to the kingdom called Animalia. They are eukaryotes and multi-cellular living organisms. Animals are locomotive (i.e., ability to move around), heterotrophic (i.e., consume organic material as a source of food), and reproduce sexually (with the exceptions of asexual organisms). The study of animals is called Zoology.

Types of Animals and Their Characteristics | Biology Explorer

Aerobic respiration is the process most living things undergo to use food energy. Here, we will investigate the definition, the steps of the process, what goes in and what comes out of the process ...

Aerobic Respiration: Definition, Steps, Products & Equation

Biology: Biology, study of living things and their vital processes that deals with all the physicochemical aspects of life. Modern principles of other fields, such as chemistry, medicine, and physics, for example, are integrated with those of biology in areas such as biochemistry, biomedicine, and biophysics.

Mississippi SATP2 Biology I Student Review Guide

SOIL PROFILE. The ground is modified and enriched by the plants growing on it. Making a section of soil (figure 4), you can observe different layers: a layer rich in organic matter, the humus (O); a layer rich in roots and living organisms (A); a layer less rich in life, but still used by roots (B) and an inert soil (C).

Science Experiments on Environmental Education and Biology

Evolution: Evolution, theory in biology postulating that the various types of plants, animals, and other living things on Earth have their origin in other preexisting types and that the distinguishable differences are due to modifications in successive generations. It is one of the keystones of modern biological theory.

Virtual Labs Created by Glencoe. Many of these labs allow students to test multiple variables.

Caution: the journal and data entry sections of the simulations do not work, so you probably will want to arrange for students to write these on their own pages.
