How can large, successful firms blend the structure of big with the agile of small to create new, innovative business models, products, and solutions for consumers? To find out, I chatted with ...

Big Firms Can't Innovate: How P&G Ventures Is Dispelling ...

We recently analyzed employee survey data from two global BCG data sources, comprising more than 200,000 respondents. Our findings show clearly that women start their careers with just as much ambition as men. 1 Women's ambition levels do vary, but they vary by company, not by family status. When companies create a positive culture and attitude regarding gender diversity, all women—mothers ...

Dispelling the Myths of the Gender "Ambition Gap" - People ...

The days of taking a waterfall approach to application development and delivery are gone. Many organizations are embracing agile methodologies, and as a result they are acknowledging the need for continuous testing. The shift to an increasingly flexible and dynamic development process requires rapid ...

If you want to hit the ball farther I think you have a few options: Increase your swing speed (most people advocate this method) Hit the ball closer to the sweet spot (I like this one personally); Make sure you are playing with the correct equipment (also believe in this); I believe number 2 and number 3 are reasonable ways to add distance to anyone's game, and I've written articles about ...

The Swing Speed Study: Dispelling the Myths Amongst Golfers

It seems to be widely accepted as fact that Peter Crouch only scores goals for England when faced with weak opposition. Having never felt that this reputation was justified, I have investigated statistically and found startling results that show that he is an incredibly prolific and underrated international centre forward and will change the face of Peter-Crouch-only-scores-against-rubbish ...

The Peter Crouch Myth - on Goals Scored

The hard truth is that any unsafe system or individual puts everyone at risk. There have been a slew of major data breaches in recent years. The number of records exposed in data breaches last year alone reached 174.4 million—close to five times the 36.6 million records exposed in 2016.

Observations suggest that the expansion of the universe will continue forever. If so, then a popular theory is that the universe will cool as it expands, eventually becoming too cold to sustain life. For this reason, this future scenario once popularly called "Heat Death" is now known as the Big Chill or Big Freeze. If dark energy—represented by the cosmological constant, a constant energy ...

A post I wrote a little over two years ago concluded that solar PV capacity factors in the US ranged between 13% and 19% with an average of around 16%. Recently, however, the US Energy Information Agency published a table showing an average capacity factor of around 28% for utility-sized PV plants in the US in 2015. This post looks into the reasons for this large difference and also addresses ...
