Biology Coloring Pages Worksheets - Printable Worksheets

Evidence of common descent of living organisms has been discovered by scientists researching in a variety of disciplines over many decades, demonstrating that all life on Earth comes from a single ancestor. This forms an important part of the evidence on which evolutionary theory rests, demonstrates that evolution does occur, and illustrates the processes that created Earth's biodiversity.

A helpful revision guide providing a detailed explanation of the Sliding Filament Theory, such as the cross-bridge cycle, for GCSE biology.

The Sliding Filament Theory - Getting-in

A crocodile's physical traits allow it to be a successful predator. Its external morphology is a sign of its aquatic and predatory lifestyle. Its streamlined body enables it to swim swiftly; it also tucks its feet to the side while swimming, making it faster by decreasing water resistance. Crocodiles have webbed feet which, though not used to propel them through the water, allow them to make ...

Exchange surfaces. Many organ systems are specialised so that they can maximise the amount of materials exchanged over their membranes. There are a number of ways in which the effectiveness of an exchange surface can be increased.

Exchange surfaces in Cells

For the NBB major, elective courses are offered from different programs, departments and schools. While this distinction is not critical for your progress through the major, it is important to know that because of the interdisciplinary nature of the NBB Program, elective courses might not be offered on a regular basis or might be added to the elective list at the last moment.
