Synthetic biologists seek to understand, design and extend biology, and biological tools, from their simplest component parts and processes. Such a reductionist approach has been a paradigm shift in molecular biology and has fostered the rapid growth of the Synthetic Biology field and its subdivisions: Biodesign engineering, xenobiology, synthetic genomics among others.

Teleology or finality is a reason or explanation for something as a function of its end, purpose, or goal. It is derived from two Greek words: telos (end, goal, purpose) and logos (reason, explanation). A purpose that is imposed by a human use, such as that of a fork, is called extrinsic. Natural teleology, common in classical philosophy but controversial today, contends that natural entities ...

The "four causes" are elements of an influential principle in Aristotelian thought whereby explanations of change or movement are classified into four fundamental types of answer to the question "why?". Aristotle wrote that "we do not have knowledge of a thing until we have grasped its why, that is to say, its cause." While there are cases where identifying a "cause" is difficult, or in which ...
