Principles of Ecology. Ecology is the study of the interactions between organisms and the environment they live in, which brings us to another important term that's used frequently in ecology: the ...

The Environment, Levels of Ecology and Ecosystems - Study.com

This course is designed to provide an overview on epidemiology and the Internet for medical and health related students around the world based on the concept of Global Health Network University and Hypertext Comic Books.

Supercourse: Epidemiology, the Internet, and Global Health

Summary of the Chapter. All landforms are composed of rocks or their weathered by products. Three main types of rocks can be identified on the Earth's surface: igneous, sedimentary and metamorphic.

CHAPTER 10 - STUDY GUIDE - Physical geography

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Biology - Wikipedia

Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth revolves around the Sun in 365.26 days, a period known as an Earth year.

Earth's Systems Unit Bundle by Stephanie Elkowitz | TpT

Credits: 1. Prerequisite: Middle school biology and chemistry. Recommended: 9th or 10th Test Prep: CLEP Biology This course covers the basic material for this exam, but this is considered a very hard test, and I would suspect more will need to be studied to learn everything required for this huge exam. It's worth the same as two college courses which is why it covers so much.

Biology with Lab - Easy Peasy All-in-One High School

This course is designed to provide an overview on epidemiology and the Internet for medical and health related students around the world based on the concept of Global Health Network University and Hypertext Comic Books.

Supercourse: Epidemiology, the Internet, and Global Health

This interactive module explores the environmental factors and species involved in five major mass extinctions. Extinction is a normal part of the evolutionary process. But during five periods in Earth's history, extinction rates greatly exceeded normal levels. This Click & Learn allows students ...

Mass Extinctions Interactive | HHMI BioInteractive

Not long ago, DNA sequencing was a time-consuming, tedious process. With readily available commercial equipment and kits, it is now routine. The techniques used in this lab are applicable in a wide variety of settings, including scientific research and forensic labs. The Bacterial Identification ...

Bacterial Identification Virtual Lab | HHMI BioInteractive

In this activity, learners explore the size and scale of the universe by shrinking cosmic scale in 4 steps, zooming out from the realm of the Earth and Moon to the realm of the galaxies.

Nasa Wavelength | Science Mission Directorate

Introduction. Climate-smart agriculture (CSA) is context-specific, with many approaches potentially being CSA somewhere, but no single practice being CSA everywhere. What is climate-smart also changes with time. This means that when initiating new activities, restructuring existing agricultural programs to enhance CSA goals, or scaling up ongoing projects, CSA interventions should be designed ...

Situation analysis | Climate-Smart Agriculture Guide

Grasslands are characterized as lands dominated by grasses rather than large shrubs or trees. There are two main divisions of grasslands: tropical grasslands, called savannas, and temperate grasslands. Grasslands. Grassland biomes are large, rolling terrains of grasses, flowers and herbs.
