The method section of an APA format psychology paper provides the methods and procedures used in a research study or experiment. This part of an APA paper is critical because it allows other researchers to see exactly how you conducted your research. This allows other researchers to reproduce your experiment if they want and to assess alternative methods that might produce differing results.

Those who subscribe to this method, feel that working from an outline has the potential to hinder the writing process. Rather than conform to a pre-set itinerary, the contention is that the uncharted writing process affords the writer room for creativity, and an ever-changing vision, whereas the outline blocks the free-flowing thought process.
