INTRODUCTION. Resilience refers to the process of overcoming the negative effects of risk exposure, coping successfully with traumatic experiences, and avoiding the negative trajectories associated with risks (43, 65, 72, 84, 106). A key requirement of resilience is the presence of both risks and promotive factors that either help bring about a positive outcome or reduce or avoid a negative ...

Precede Applications - L W Green

The transtheoretical model of behavior change is an integrative theory of therapy that assesses an individual's readiness to act on a new healthier behavior, and provides strategies, or processes of change to guide the individual. The model is composed of constructs such as: stages of change,

processes of change, levels of change, self-efficacy, and decisional balance.

Transtheoretical model - Wikipedia

An estimated 23 million people in the United States (11.5% of the adult population) have chronic kidney disease (CKD) and are at increased risk for cardiovascular events and progression to kidney failure. 1-5 Similar estimates of burden of disease have been reported around the world. 6 Although there are proven therapies to improve outcomes in patients with progressive kidney disease, these ...
