There are more than 1800 questions with answers written by our expert editors. All questions are organized into 92 subject reviews encompassing the main topics of biology.

**Biology Answers - Biology Questions**

Best answer: Yes, they have to cut the muscle of the oyster to get the shell to open. The oysters themselves are eaten, the shells are sold to make 'pearl buttons' and some jewelry pieces, so all the parts are used. I think even the parts of the shells that aren't useable for the interior shiny bits are ground up for chickens - it's all calcium and that is fed to chickens that are laying eggs.
