1. Introduction. The widespread use of digital technologies has led to the emergence of big data business analytics (BDBA) as a critical business capability to provide companies with better means to obtain value from an increasingly massive amount of data and gain a powerful competitive advantage (Chen et al., 2012). BDBA incorporates two dimensions: big data (BD) and business analytics (BA).

Big data analytics in logistics and supply chain ...

In estimation theory, the extended Kalman filter (EKF) is the nonlinear version of the Kalman filter which linearizes about an estimate of the current mean and covariance. In the case of well defined transition models, the EKF has been considered the de facto standard in the theory of nonlinear state estimation, navigation systems and GPS.
