Benihana Simulation Best Strategy Answer

Benihana Simulation Report, Group 6, Module B Hanover Introduction: The Benihana Simulation provides different types of examples that are designed to implement appropriate operational strategies in the daily basis services of the restaurant. The simulation consists of 5 strategic challenges related to Batching, Bar, dining space design advertisement and restaurant timing.

Benihana Simulation Report Group 6 Hanover - BENIHANA ...

In Benihana simulation, the timing was controlled by the person cooking the food and serving it. He could serve swiftly, perform less or even give non verbal cues to the customers so that they finish fast. This strategy could be used in peak time to increase the throughput. In the lean time the cook would take more time to serve and perform more.
