Balancing chemical equations is a math-like skill that can be achieved through repetitive practice. Start out with simple chemical equation and gradually build to greater difficulty. Often students need to see the process many times until an 'ah-ha' moment occurs. I first teach the concept of balancing chemical equations (see video below).

In the Chemical Reactions Chemistry Laboratory Kit, students perform five reactions, look for evidence of a chemical reaction in each case, write equations for each reaction and classify reactions according to reaction type.

Chemical Reactions—Student Laboratory Kit - Flinn Scientific

They then determine the products from each microscale reaction, using this information to write and balance accurate chemical equations. Finally, students select their own reagents, run a reaction, determine the reaction type, and write the balanced chemical equation. Kit includes enough materials for at least 30 students working in groups.
