Every retaining wall supports a "wedge" of soil. The wedge is defined as the soil which extends beyond the failure plane of the soil type present at the wall site, and can be calculated once the soil friction angle is known. As the setback of the wall increases, the size of the sliding wedge is reduced.

The predictors used for teacher selection can be chosen because they are hypothesized to target one or more target outcomes. Fig. 2 provides a model (adapted from Ployhart & Schneider, 2012) that shows how selection methods are built on inferred relations. In this model, the latent constructs are represented by circles, and the observed variables (the measures used in selection) are ...

Emily Dickinson is one of America's greatest and most original poets of all time. She took definition as her province and challenged the existing definitions of poetry and the poet's work. Like writers such as Ralph Waldo Emerson, Henry David Thoreau, and Walt Whitman, she experimented with expression in order to free it from conventional restraints.

In 1995, the Joint Commission began requiring that hospitals report reviewable sentinel events as a condition of maintaining accreditation. Since then, inpatient suicide has been the second most common sentinel event reported to the Joint Commission. The Joint Commission emphasizes the need for around-the-clock observation for inpatients assessed as at high risk for suicide.
