NOVA - Official Website | What Darwin Never Knew

Futuyma: No, certainly not. There cannot be evolution without genetic variation in the first place. So there must be mutation and often recombination to generate the different genotypes or the different versions of the genes, known as alleles, which then may or may not make a difference in the ability of an organism to survive and reproduce.

Which statement about the beak size of finches on the island of Daphne Major during prolonged drought is true? A) Each bird evolved a deeper, stronger beak as the drought persisted.

AP Biology Chapter 23 Flashcards | Quizlet

In some circles, however, opposition to the concept of evolution has persisted to the present. The argument from design has recently been revived by a number of academics with scientific credentials, who maintain that their version of the idea (unlike Paley's) is soundly supported by both microbiology and mathematics.

Bird HotLine — Vet Talk: Your Questions Answered

I find it amazing that evolutionists have absolutely no actual proof or evidence for their theory, but continually use gobbledegook, double-speak and circular reasoning, as in this article (and many more), to try and convince others (and probably themselves, as the alternative is unthinkable to them), that evolution is a fact.

BBC on evolution - creation.com

Charles Darwin: Delivering the Evolutionary Gospel. Charles Darwin would not have been anyone's first guess for a revolutionary scientist. As a young man, his main interests were collecting beetles and studying geology in the countryside, occasionally skipping out on his classes at the University of Edinburgh Medical School to do so.

The 10 Greatest Scientists of All Time | DiscoverMagazine.com

The history of ornithology largely reflects the trends in the history of biology, as well as many other scientific disciplines, including ecology, anatomy, physiology, paleontology, and more recently, molecular biology. Trends include the move from mere descriptions to the identification of patterns, thus towards elucidating the processes that produce these patterns.

Avian Vet Question? Our Avian Vet will answer your questions!

Tool use by animals is a phenomenon in which an animal uses any kind of tool in order to achieve a goal such as acquiring food and water, grooming, defense, recreation or construction. Originally thought to be a skill possessed only by humans, some tool use requires a sophisticated level of cognition. There is considerable discussion about the definition of what constitutes a tool and therefore ...
