Carolina Investigations® for AP® Biology: Origin of Life. Using kit materials, students explore the origin of life by creating coacervates—phospholipid vesicles similar to those created in the laboratory by Alexander Oparin in the 1920s. Extending their new knowledge of coacervate formation and properties, students design an investigation into...

Carolina Investigations® for AP® Biology: Origin of Life ...

Coacervates Lab. These organized clusters of droplets are called coacervates, and they have some of the properties of living cells. Consequently, such structures may represent one of the early stages in the origin of life. In this activity, you can produce coacervates, study the conditions under which they form, and observe some of their life-like properties.
