Bright Earth is a chemistry lesson, a history of art, a bestiary of color: and most of all, a worthwhile work bound to engage both the professional and the layman. It reveals that the pigments of art themselves have as complex a history as the art from which they are made, and indeed, influence subtly and thoroughly the art which can be made.

ArtScope.net: Bright Earth: Art and the Invention of Color ...

From Egyptian wall paintings to the Venetian Renaissance, impressionism to digital images, Philip Ball tells the fascinating story of how art, chemistry, and technology have interacted throughout the ages to render the gorgeous hues we admire on our walls and in our museums. Finalist for the 2002 National Book Critics Circle Award.
