A stochastic simulation is a simulation that traces the evolution of variables that can change stochastically with certain probabilities.. With a stochastic model we create a projection which is based on a set of random values. Outputs are recorded and the projection is repeated with a new set of random values of the variables. These steps are repeated until a sufficient amount of data is ...

There is also some evidence that exposure to 3DP during these subjects may also improve attitudes towards 3DP [35,183,245]. As one student commented when electing to use 3DP to create biological models, "I feel using the 3D printer to design and create a project allowed me to learn a lot more about the subject than I otherwise would have. However, the most valuable part of this project was the ...

In this paper, we address the problem of generating person images conditioned on both pose and appearance information. Specifically, given an image x_a of a person and a target pose $P(x_b)$, extracted from a different image x_b , we synthesize a new image of that person in pose $P(x_b)$, while preserving the visual details in x_a .
