Animal Reservoirs. A certain species of malaria called *P. knowlesi* has recently been recognized to be a cause of significant numbers of human infections. *P. knowlesi* is a species that naturally infects macaques living in Southeast Asia. Humans living in close proximity to populations of these macaques may be at risk of infection with this zoonotic parasite.

Big bangs and stardust, primordial soup, meteorites with amino acids, or maybe aliens seeded life on earth? A Creator God is a much more logical choice.

### **Origin of Life | Answers in Genesis**

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.
