The human brain is the central organ of the human nervous system, and with the spinal cord makes up the central nervous system. The brain consists of the cerebrum, the brainstem and the cerebellum. It controls most of the activities of the body, processing, integrating, and coordinating the information it receives from the sense organs, and making decisions as to the instructions sent to the ...

Extra-axial brain tumors are the most common adult intracranial neoplasms and encompass a broad spectrum of pathologic subtypes. Meningiomas are the most common extra-axial brain tumor (approximately one-third of all intracranial neoplasms) and typically present as slowly growing dural-based masses.

BASIC STRUCTURE OF NERVE CELLS ("NEURONS") "Swiftly the brain becomes an enchanted loom, where millions of flashing shuttles weave a dissolving pattern-always a meaningful pattern-though never an abiding one" (Sherrington, 1940). Nerve cells comprise the "enchanted loom" that is our brain. Here are three absolutely wonderful facts about nerve cells.

The What the Hell is it Actually Called Blue Box. The cerebrum is the whole big top/outside part of the brain but it also technically includes some of the internal parts too.. Cortex means "bark" in Latin and is the word used for the outer layer of many organs, not just the brain. The outside of the cerebellum is the cerebellar cortex. And the outside of the cerebrum is the cerebral cortex.

According to the SEER cancer statistics, 1,658,370 persons will develop new cancers in 2015 and 589,430 will die from cancer. Compared to this, the number of new primary brain tumors (BT), 22,850 or 1.4%, is relatively small. However, if one adds metastases from other cancers to the brain, the number of BT increases significantly.

1. Introduction. Our gut harbours trillions of symbiotic microorganisms that are essential and beneficial not only for the regulation of host physiology, but also for the appropriate development of central nervous system (CNS) and brain responses (Cryan and O'Mahony, 2011, Dinan and Cryan, 2013, Qin et al., 2010). The microbiota-gut-brain axis is a bidirectional pathway through which the brain ...
