A simulation is an approximate imitation of the operation of a process or system; the act of simulating first requires a model is developed. This model is a well-defined description of the simulated subject, and represents its key characteristics, such as its behaviour, functions and abstract or physical properties.

Working in retail. I sell phones while I'm on commissions and sales are what pay my bills, 90% of my job is helping people do things with their phones that they could have figured out on their own with a Google search that would have taken 3 minutes, or next to no time at all if they would have just read their damn screen and did what it fucking said.
