Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

When I work as a pharmacist in a retail pharmacy, I get a lot of questions from customers on which painkiller is best for them. Unfortunately, the answer is usually not black and white: it really depends on their medical conditions. That's why pharmacists are here to recommend products using their professional judgment. Thank god the BC provincial bylaw states that a retail pharmacy must not ...
