Big Solutions To Water Pollution

Information about the types, causes, and effects of water pollution and what we can do to solve the problem.

Water pollution: An introduction to causes, effects, solutions

Water pollution is the contamination of water bodies, usually as a result of human activities. Water bodies include for example lakes, rivers, oceans, aquifers and groundwater. Water pollution results when contaminants are introduced into the natural environment. For example, releasing inadequately treated wastewater into natural water bodies can lead to degradation of aquatic ecosystems.
