A short History of the Real-time ultrasound scanner, At around the same time, steered-beam phased array transducers and annular array transducers with more complicated electronic circuitry were described, and had found their way into echocardiographic examinations because of the relatively small contact surface. The phased-array scanning mechanism was first described by Jan C Somer at the ...

A short History of the Real-time ultrasound scanner

The history of photography began in remote antiquity with the discovery of two critical principles: camera obscura image projection and the observation that some substances are visibly altered by exposure to light. There are no artifacts or descriptions that indicate any attempt to capture images with light sensitive materials prior to the 18th century.
