`A Straight Line to my Heart' is the new standalone YA novel from Aussie author, Bill Condon. I didn't really know what to expect from `Straight Line' - the blurb seemed to be grasping at straws and the title was giving nothing away. So I started the book a bit wary, but I came away with wet eyes and a smile tugging at my mouth.

I'm still stuck on the idea of "on point". So I consider diagonal lines that will highlight the blocks. This has real possibilities. I have added lines for stitching the border, and I like these lines, too. They are pleasing to my eye and I can hide many of the starts and stops under the binding; always a good thing.

When geometry was first formalised by Euclid in the *Elements*, he defined a general line (straight or curved) to be "breadthless length" with a straight line being a line "which lies evenly with the points on itself". These definitions serve little purpose since they use terms which are not, themselves, defined.
