Plant and Cell Biology General cell and plant biology (poster session only) Poster session dates: 4 and 5 July 2018. The general cell and plant biology session invites posters on all the aspects of plant and cell biology that are not catered for in the specific section sessions.

Plant Biology

Many plants have impenetrable barriers, such as bark and waxy cuticles, or adaptations, such as thorns and spines, to protect them from herbivores. If herbivores breach a plant's barriers, the plant can respond with secondary metabolites, which are often toxic compounds, such as glycol cyanide, that may harm the herbivore.

Plant Defense Mechanisms | Boundless Biology

Chapter 25 Plant Responses and Adaptation. In this chapter, students will read about the effects of the four major types of plant hormones (auxins, cytokinins, gibberellins, and ethylene); plant responses such as tropisms, photoperiodism, and responses to seasonal changes; and mechanisms of adaptation to extreme environments and attacks by ...

Plant Biology - Biozone

Adaptations to Air. Plants called epiphytes grow on other plants. They obtain moisture from the air and make food by photosynthesis. Most epiphytes are ferns or orchids that live in tropical or temperate rainforests (see Figure below). Host trees provide support, allowing epiphyte plants to obtain air and sunlight high above the forest floor.
