Classical electromagnetism or classical electrodynamics is a branch of theoretical physics that studies the interactions between electric charges and currents using an extension of the classical Newtonian model. The theory provides a description of electromagnetic phenomena whenever the relevant length scales and field strengths are large enough that quantum mechanical effects are negligible.

En physique, le vecteur de Poynting indique la direction de propagation d'une onde électromagnétique, dans un milieu isotrope. On le note  $\vec{S}$ ,  $\vec{s}$ ,  $\vec{\sigma}$  ou  $\vec{\rho}$ . Le flux du vecteur de Poynting à travers une surface (fermée ou non) est égal à la puissance véhiculée par l'onde à travers cette surface.. Le module de ce vecteur est donc une puissance par unité de surface, c'est-à-dire un ...

O paramagnetismo consiste na tendência que os dipolos magnéticos atômicos têm de se alinharem paralelamente com um campo magnético externo. Este efeito ocorre devido ao spin mecânico-quântico, assim como o momento angular orbital dos elétrons. Caso estes dipolos magnéticos estejam fortemente unidos então o fenômeno poderá ser o ferromagnetismo ou o ferrimagnetismo.

Il momento magnetico (magnetic moment) è una grandezza fisica che misura la tendenza di un dipolo magnetico a allinearsi con un campo magnetico esterno. Il momento magnetico è un vettore che ha la stessa direzione del campo magnetico esterno. Il momento magnetico è misurato in Joules per Tesla (J/T). Il momento magnetico è una grandezza fisica che misura la tendenza di un dipolo magnetico a allinearsi con un campo magnetico esterno.

Indice di rifrazione - Wikipedia, l'enciclopedia libera

In fisica, l'indice di rifrazione di un materiale è una grandezza adimensionale che quantifica la diminuzione della velocità di propagazione della radiazione elettromagnetica quando attraversa un materiale. La diminuzione della velocità di propagazione viene accompagnata dalla variazione della sua direzione, secondo il fenomeno della rifrazione.. Si tratta di una grandezza utilizzata in ...
