The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...

Earlier in Lesson 6, four kinematic equations were introduced and discussed. A useful problem-solving strategy was presented for use with these equations and two examples were given that illustrated the use of the strategy. Then, the application of the kinematic equations and the problem-solving strategy to free-fall motion was discussed and illustrated.

The first step of the assessment strategy relates to manufacturing and product performance. The second assessment step is designed to analyze the chemical composition of the aerosol generated by the candidate MRTP (aerosol physics and chemistry) and to quantify the reduction in HPHCs (Schaller et al., 2016). The third step of the assessment focuses on whether the reduced formation of HPHCs does ...
