Biology Spring Final 2014 Study

Biology is the natural science that studies life and living organisms, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution. Despite the complexity of the science, there are certain unifying concepts that consolidate it into a single, coherent field. Biology recognizes the cell as the basic unit of life, genes as ...

Biology - Wikipedia

Developmental biology is the study of the process by which animals and plants grow and develop. Developmental biology also encompasses the biology of regeneration, asexual reproduction, metamorphosis, and the growth and differentiation of stem cells in the adult organism.. In the late 20th century, the discipline largely transformed into evolutionary developmental biology

Developmental biology - Wikipedia

At the Biology Learning Center, our single goal is providing biological science students with the tools and skills needed to achieve success in the various biological fields. Located in Acad 204 B, our center is filled with resources that students and tutors can use, such as computers, four flat screen monitors, textbooks, digital microscopes, slides, and models of cells and the human body.
