Business Analysis And Valuation 2nd

Business valuation is a process and a set of procedures used to estimate the economic value of an owner's interest in a business. Valuation is used by financial market participants to determine the price they are willing to pay or receive to effect a sale of a business. In addition to estimating the selling price of a business, the same valuation tools are often used by business appraisers to ...

Business valuation - Wikipedia

My name is Aswath Damodaran and I teach corporate finance and valuation at the Stern School of Business at New York University. I describe myself as a teacher first, who also happens to love untangling the puzzles of corporate finance and valuation, and writing about my experiences.

Fundamental analysis, in accounting and finance, is the analysis of a business's financial statements (usually to analyze the business's assets, liabilities, and earnings); health; and competitors and markets. It also considers the overall state of the economy and factors including interest rates, production, earnings, employment, GDP, housing, manufacturing and management.
