Reproduction (or procreation or breeding) is the biological process by which new individual organisms – "offspring" – are produced from their "parents". Reproduction is a fundamental feature of all known life; each individual organism exists as the result of reproduction. There are two forms of reproduction: asexual and sexual. In asexual reproduction, an organism can reproduce without the ...

"OPCs" and Grape Seed Extracts are Unreliable in the Marketplace. Consumers need to know that there is no industry standard for accurately identifying and quantifying products sold as OPCs (oligomeric proanthocyanidins) in the marketplace. For example, many "OPC" products claim to be standardized for "polyphenols," but that's not useful because the vast majority of polyphenols are unhealthy ...
