We think that is only true if you are playing against the world-class computer programs that know the "solution." In a game between humans, especially an over the board game, checkers is not and will never be "solved." There is too much challenge and enjoyment in the game as played by mere mortals. What has this got to do with checker problems?

The Challenge of Checker Problems - The Checker Maven

This simulation follows the original rules of checkers as close as we can make it. You are the RED checkers while the computer is the BLACK. Click on a piece that you wish to move and then click on where you want to move. RED moves first. You can only move diagonally forward; you take a piece by jumping it.

Checkers Simulation - CSGNetwork

The Checkers class is immutable - that is, an object of this class, once created, cannot ever be modified. (In a perfect world, this means that you will do all of your setup in the init () function. However, when I wrote my solution, I found it a lot easier to duplicate an object, and then change a few things.
