Calculus (from Latin calculus, literally 'small pebble', used for counting and calculations, as on an abacus) is the mathematical study of continuous change, in the same way that geometry is the study of shape and algebra is the study of generalizations of arithmetic operations.. It has two major branches, differential calculus (concerning instantaneous rates of change and slopes of curves ...

Volume 1: Modern Mechanics. Chapter 1: Interactions and Motion.. This chapter includes an introduction to 3D vectors, which is also needed for Volume 2, Electric & Magnetic Interactions.

Students | Matter & Interactions

of calculus or infinitesimal calculus, is a history of a mathematical discipline focused on limits, functions, derivatives, integrals, and infinite series. Isaac Newton and Gottfried Leibniz independently invented calculus in the mid-17th century. A rich history and cast of characters participating in the development of calculus both preceded and followed the contributions of these singular ...

This site is intended as a resource for university students in the mathematical sciences. Books are recommended on the basis of readability and other pedagogical value. Topics range from number theory to relativity to how to study calculus.

Books in the Mathematical Sciences

An operational calculus converts derivatives and integrals to operators that act on functions, and by doing so ordinary and partial linear differential equations can be reduced to purely algebraic equations that are much easier to solve. There have been a number of operator methods created as far back as Leibniz, and some operators such as the Dirac delta function created controversy at the

Limit. The term limit comes about relative to a number of topics from several different branches of mathematics. A sequence of elements in a topological space is said to have limit provided that for each neighborhood of , there exists a natural number so that for all .This very general definition can be specialized in the event that is a metric space, whence one says that a sequence in has ...
