The Business Analysis Process: 8 Steps to Being an ...

A gap analysis is a method of assessing the differences in performance between a business' information systems or software applications to determine whether business requirements are being met and, if not, what steps should be taken to ensure they are met successfully. Gap refers to the space between "where we are" (the present state) and "where we want to be" (the target state).

What is gap analysis? - Definition from WhatIs.com

Gap analysis compares the gap between an organization's actual performance against its potential performance. In gap analysis, you typically list out the organization's current state, its desired state, and a comprehensive plan to fill out the gap between these two states. This analysis can ...

Definitions and usage. The term digital divide describes a gap in terms of access to and usage of information and communication technology. It was traditionally considered to be a question of having or not having access, but with a global mobile phone penetration of over 95%, it is becoming a relative inequality between those who have more and less bandwidth and more or fewer skills.
