In mathematics and mathematical logic, Boolean algebra is the branch of algebra in which the values of the variables are the truth values true and false, usually denoted 1 and 0 respectively. Instead of elementary algebra where the values of the variables are numbers, and the prime operations are addition and multiplication, the main operations of Boolean algebra are the conjunction and denoted ...

It is the same when we multiply binomials! Instead of Alice and Betty, let's just use a and b, and Charles and David can be c and d:. We can multiply them in any order so long as each of the first two terms gets multiplied by each of the second two terms.. But there is a handy way to help us remember to multiply each term called "FOIL".It stands for "Firsts, Outers, Inners, Lasts":
