Definition 1: The covariance between two sample random variables  $x$  and  $y$  is a measure of the linear association between the two variables, and is defined by the formula. Observation: The covariance is similar to the variance, except that the covariance is defined for two variables ( $x$  and  $y$  above) whereas the variance is defined for only one variable. In fact,  $\text{cov}(x, x) = \text{var}(x)$ .
