This section describes the highly organized structures of solids, distinguishes between a crystal lattice and a unit cell, and explains how allotropes of an element differ.

Name Date Class STATES OF MATTER 13

Using chemistry to solve crimes is a very common practice. Chemical and physical properties of substances can be used to match a suspect to a crime scene. This is very frequently done with blood samples, but as no one was willing to donate about a quart of blood for this experiment, we will have to use simpler substances.
