MPLS is a new forwarding mechanism called "label switching" in which packets are forwarded based on labels. However, hosts are unaware about labeled packets so routers will need to add a label when entering "MPLS area" and remove that label after leaving there.

CCNA Training

CCNA is a popular certification among computer network engineers. Full Form of CCNA is Cisco Certified Network Associate. It is a certification program valid for all type of engineers. It includes entry-level network engineers, Network Administrators, Network Support Engineers and Network ...

CCNA Certification Tutorial: Introduction & Basics

Case Studies. This chapter presented several interesting aspects of how firewalls operate and how they can be deployed in networks. The introduction of this information needs to be reinforced with some real-world case studies that provide some answers to questions you might still have and clarify the important aspects of what has already been covered.

NAT Basics Overview. NAT basics, also known as network address translation is an important part of the CCENT and CCNA certification exams. When NAT is implemented it allows a router to translate the source IPv4 address in the packet header as it crosses the router, changing the source address in the packet from one address to another.
