Habitat Animal Printouts. The Earth has many different environments, varying in temperature, moisture, light, and many other factors. Each of these habitats has distinct life forms living in it, forming complex communities of interdependent organisms. A complex community of plants and animals in a region and a climate is called a biome.

AceSuperstar (Ashford U SCI 207 / SCI207 Class Answers)

And yet as we said, much of the life in the seas exists relatively close to land. Which means it is also close to human beings and their pollution -- including run-off from dirty city drains and from farmlands that use pesticides and artificial fertilizers.

Oceans & Marine Life Science - Earth's Kids

As humans we are part of the environment. With over 7.5 billion of us on Earth, our combined actions also have a big impact on the environment.

Environmental Science Science Projects

Biodiversity is a contraction of biological diversity. It reflects the number, variety and variability of living organisms and how these change from one location to another and over time. Biodiversity includes diversity within species (genetic diversity), between species (species diversity), and between ecosystems (ecosystem diversity).

1. Biodiversity: What is it, where is it, and why is it ...

The zebra mussel (*Dreissena polymorpha*) is a small freshwater mussel. This species was originally native to the lakes of southern Russia and Ukraine. However, the zebra mussel has been accidentally introduced to numerous other areas, and has become an invasive species in many countries worldwide. Since the 1980s, they have invaded the Great Lakes and the Hudson River.

Zebra mussel - Wikipedia

Most of the items listed below are available at hardware or garden center stores. Also, well in advance, ask students to bring plastic containers from home, or rinse out plastic containers from a recycling bin.
