Systems Engineering and Analysis - Benjamin S. Blanchard ...

p.18 [Systems Engineering is] An approach to translate operational needs and requirements into operationally suitable blocks of systems. The approach shall consist of a top-down, iterative process of requirements analysis, functional analysis and allocation, design synthesis and verification, and system analysis and control.

Systems Engineering and Analysis (Blanchard, Fabrycky, 2006)

System of Systems Large-scale inter-disciplinary problems involving multiple, heterogeneous, distributed systems. • System elements operate independently. • System elements have different life cycles. • The initial requirements are likely to be ambiguous. • Complexity is a major issue. • Management can overshadow engineering.
