The Argument for and Against the Case Study Research Design. Some argue that because a case study is such a narrow field that its results cannot be extrapolated to fit an entire question and that they show only one narrow example. On the other hand, it is argued that a case study provides more realistic responses than a purely statistical survey.

case study as a research method 2 investigate contemporary real-life phenomenon through detailed contextual analysis of a limited number of events or conditions, and their relationships.

### **Case study as a research method - psyking.net**

Different types of case study research methods. In business research, four common case study approaches are distinguished. First, there is the "no theory first" type of case study design, which is closely connected to Kathleen M. Eisenhardt's methodological work. The second type of research design is about "gaps and holes", following Robert K. Yin's guidelines and making positivist assumptions.
