The Stone Age is contemporaneous with the evolution of the genus Homo, the only exception possibly being the early Stone Age, when species prior to Homo may have manufactured tools. According to the age and location of the current evidence, the cradle of the genus is the East African Rift System, especially toward the north in Ethiopia, where it is bordered by grasslands.

This “Three Age System” has received some criticism. There are scholars who believe that this approach is too technologically oriented. Others say that this stone-bronze-iron pattern has hardly any meaning when applied outside Europe. Despite the critics, this system is still largely used today and, although it has limitations, it can be helpful as long as we remember that it is a ...
