Burn the Fat, Feed the Muscle: Transform Your Body Forever Using the Secrets of the Leanest People in the World - Kindle edition by Tom Venuto. Health, Fitness & Dieting Kindle eBooks @ Amazon.com.

Eating the same number of calories every day – in a deficit – is the simplest and most common approach for setting up a fat loss program. But did you ever consider that you could intentionally consume different amounts of calories on different days, shift the way that you monitor your calorie deficit, and that might make it easier to follow your diet and make you a happier eater?

Yes, it's possible, but you have to focus on two important things if you want to lose fat and gain muscle at the same time: protein and strength training.

How to Lose Fat and Gain Muscle at the Same Time | SELF

Adding muscle to your body burns fat because, well, muscle needs energy to survive. A pound of muscle uses between 75 and 150 calories a day (remember, it's working and using energy), while a pound of fat only needs 3 calories a day (fat does nothing to help your body, the ingrate, so it doesn't need energy to maintain itself).

How does building muscle help me lose fat and stay slim? | Exercise For Weight Loss - Sharecare - Sharecare: Get Expert Health Advice, Find a Doctor & Manage Your Health

Does Cardio Burn Muscle? Its a well known fact that doing cardio everyday is the most important thing you can do for your health but lets assume you don't care about your health, lets talk about gaining muscle. I know you are used to hearing that "cardio burns muscle" but I'm going to show you why that's wrong.

That's despite the fact that subjects taking part in the study made no special effort to maintain muscle mass. Nobody lifted any weights. Nor was there any emphasis on maintaining a high protein intake, which averaged just 80 grams per day on the feed days and 24 grams on the fast days (food intake during the study was reported here).. In 2011, Dr Krista Varady of the University of Illinois ...

Intermittent Fasting and Muscle Loss: Does Intermittent Fasting Burn Muscle?

Exercising at lower intensities will use more fat for energy. This basic premise is what started the theory of the fat burning zone, which is the idea that working in a certain heart rate zone (around 55 to 65 percent of your maximum heart rate) will allow your body to burn more fat. Over the years, this theory has become so ingrained in our exercise experience that we see it touted in books ...
