Charge It! Electrons are the negatively charged particles of atom. Together, all of the electrons of an atom create a negative charge that balances the positive charge of the protons in the atomic nucleus. Electrons are extremely small compared to all of the other parts of the atom. The mass of an electron is almost 1,000 times smaller than the mass of a proton.

One of the self-serving arguments of modern evolutionists is their rather arrogant claim that creationist scientists are not real scientists. No matter that a large number of creationists have earned authentic Ph.D. degrees in science, hold responsible scientific positions and have published numerous scientific articles and books—if they are creationists, they are not true scientists!

Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...
