Also, in quantum mechanics, the energy of an electron is derived based on the theory of relativity, as exemplified in the theory of Sommerfeld. However, this paper points out that the previous energy formula based on the theory of relativity is mistaken. It also proposes a previously unknown formula for the kinetic energy of an electron.

The book does not discuss General Relativity. Bohm does not derive many formulas for electrodynamics, optics, quantum physics, thermodynamics, etc, and therefore this book does not resemble a text book. Bohm's focus is on a deeper understanding of the special theory of relativity itself, and on time and space.
