If you have experienced severe pain and high levels of inflammation in one joint and you have no known injuries or medical conditions that could cause such pain, you may want to be tested for gout. Gout happens when too many uric acid crystals form around a joint, causing pain. Most patients with gout experience pain in the joint of the big toe first, but any joint can be affected.

### **How to Test for Gout (with Pictures) - wikiHow**

What is a spirometry test? Spirometry is a simple, non-invasive test that is used to diagnose COPD. When you take the test, you will be asked to blow all the air out of your lungs into a mouthpiece connected to a machine known as a spirometer. The machine will calculate two numbers: the amount of air you blow out in the first second, and the amount of air you blow out in 6 seconds or more.
