macaroni? Which birds would be most successful? Which birds would . be least successful? If you came back to this island (from c) in 50 years, what should you expect to . see? (What type of birds will live on the island?) How does this lab simulation provide support for the theory of evolution? Class Data: Average the data together for each ...

Activity: Bird Beak Adaptation Lab

Bird Beak Lab. In this lab, we will simulate a scramble competition (kind of like in the old kids' game, " Hungry, hungry hippos ") between six species of birds in six different environments. Each bird has a different beak type (spoonbill, tweezerbeak, tongbeak, etc.) and you will find that depending on the food available,...

Bird Beak Lab - Northern Arizona University

The group of birds known as Darwin's finches consists of fourteen species (Fig. 1), of which thirteen are found among the islands of the Galapagos archipelago. The remaining species is found on Cocos Island, which lies 600 kilometers northeast of the Galapagos (Fig. 2).
