The dissociation of SeSO_3^{2-} to Se^{2-} in chemical solution deposition of metal selenide semiconductor thin films is discussed in [20]. It is worth noting that from a SSS solution of pH 4.5 good ...

Chemical Solution Deposition of Semiconductor Film

Chemical vapor deposition. The process is often used in the semiconductor industry to produce thin films. In typical CVD, the wafer (substrate) is exposed to one or more volatile precursors, which react and/or decompose on the substrate surface to produce the desired deposit. Frequently, volatile by-products are also produced,...
